

School-Based Consultation Overview

1 IN 5 CHILDREN
have at least one diagnosable
mental health condition¹

Suicide is the **second leading cause of death**
for children ages 10-14²

The majority of children and adolescents with mental health conditions do not receive treatment³. Since 2012, MC3 has provided no-cost psychiatry consultation to primary care providers in Michigan so they can have expert and timely support as they treat pediatric and perinatal patients.

MC3 also offers psychiatry consultation and behavioral health education in select intermediate school districts (ISDs) in Michigan. This support is provided to licensed school mental health professionals and school nurses through:

MC3 School Consultation for school-based professionals to virtually meet with MC3 consulting specialists, who offer behavioral health guidance and recommendations for students.

MC3 Huddle for school-based professionals to request virtual group consultations with MC3 consulting specialists that include the student's primary care physician or other treating providers. These consultations are designed for multi-disciplinary and multi-site collaboration, offering behavioral health guidance from MC3 consulting specialists.

Web-based trainings on topics of interest to assist in managing behavioral health conditions.
