PURPOSE:
<p>The MC3 ECHO: Behavioral Health ADHD Series is a six-part virtual training from September through November 2025. Project ECHO® (Extension for Community Health Outcomes) leverages video conference technology to connect subject matter experts with health care teams and schools in local communities, fostering an “all teach, all learn” approach. Physicians, nurses, social workers and other mental health professionals present real (anonymized) cases to the specialists—and each other—for discussion and recommendations. Participants learn from one another through a combination of a brief didactic presentation with interactive case-based presentations.</p>
LEARNING OBJECTIVES:
<ul style="list-style-type: none"> • Identify ADHD and other comorbid conditions in children and adolescents through screening, assessment and testing. • Describe evidence based pharmacological treatments and behavioral interventions for children and adolescents with ADHD. • Provide psychoeducation and resources for families that will improve understanding of ADHD and how to best help children at home and at school. • Describe methods to improve workflow within practices to improve ADHD treatment management in the health care setting.
